Full-Stack Software Developer

OBJECTIVE

Full-Stack Software Developer with experience designing, developing, and deploying responsive web applications using React, TypeScript, Node.js, Express.js, Prisma ORM, and PostgreSQL. Experienced in building modern user interfaces, RESTful APIs, relational databases, and cloud-hosted applications with a strong emphasis on clean architecture, maintainability, performance, and user experience. Seeking an opportunity to contribute to a collaborative development team while continuing to grow as a full-stack software developer.

EXPERIENCE

Jan 2022 - Present

Full-Stack JavaScript Developer

Toronto, Ontario, Canada

- Designed, developed, and deployed responsive full-stack web applications using React, TypeScript, Node.js, Express.js, Prisma ORM, and PostgreSQL.
- Built production-ready single-page applications (SPAs) using React Hooks, Context API, reusable components, and scalable frontend architecture.
- Designed and implemented RESTful APIs to enable secure and efficient communication between frontend clients and backend services.
- Developed backend services using Express.js, including routing, middleware, validation, error handling, and API endpoint management.
- Designed relational database schemas and managed PostgreSQL databases using Prisma ORM, including migrations, relationships, and query optimization.
- Built and deployed cloud-hosted applications using Vercel (frontend), Render (backend), and Neon PostgreSQL, including environment variable configuration and production deployment workflows.
- Implemented persistent online leaderboard functionality with server-side score validation, ranking logic, and database integration.

- Applied frontend performance optimization techniques including lazy loading, memoization, code splitting, and efficient state management to improve rendering performance and user experience.
- Utilized Git, GitHub, and VS Code throughout the full software development lifecycle, including version control, debugging, deployment, and collaborative workflows.
- Developed responsive and accessible user interfaces using HTML5, CSS3, TypeScript, React, Bootstrap, Material UI, and modern responsive design principles.
- Demonstrated strong problem-solving skills by designing scalable application architecture, debugging complex frontend and backend issues, and delivering maintainable software solutions.
- Continuously expand technical expertise by building real-world projects and exploring modern software engineering practices, tools, and technologies.

May 2012 – Jan 2022

Sr. Quotation Specialist

Lazer-Tech Limited

www.lazer-tech.com

Toronto, Ontario, Canada

- Led the development and implementation of Price Matrices and conducted cost estimation.
- Managed the Quotation Department and helped managed processes cost adders.
- Reported directly to the President of the company.
- Assisted the Sales Team in achieving target revenue.
- Created, analyzed and submitted bid proposals.
- Assisted in negotiating Long Term Pricing Agreements with customers.
- Reviewed PCB files (gerbers) sent by customers using CAM-350, Genesis Valor, AutoCAD, AutoVue, Acrobat etc., if necessary.
- Responded to and resolved customer issues related to pricing, designs, panelization, etc.
- Called PCB designers/buyers to maintain strong company relationship.
- Assisted customer service representatives with any pricing issues.
- Acted as Technical Support for Designers seeking cost savings in their designs.
- Facilitated the exchange of relevant information to gain cooperation, solve problems, or obtain project approval.
- Provided the rationale behind changes in business directions/decisions to garner support/commitment from the department/group.
- Encouraged and managed debate over complex and highly contentious issues to a satisfactory resolution.

Jul 2004 – May 2012

Sr. Quotation Analyst

Firan Technology Group (FTG)

www.ftgcorp.com

Toronto, Ontario, Canada

- Led the development and implementation of Price Matrices.
- Managed the Quotation Department.
- Conducted cost estimation.
- Reported to the President and collaborated closely with the General Manager of the company.
- Collaborated with the Vice President of Sales and Directors of Sales to help meet target revenue.
- Made, analyzed, and submitted bid proposals.
- Took responsibility for processes cost adders.
- Assisted in negotiating Long Term Pricing Agreements with customers.
- Reviewed PCB files (gerbers) sent by customers using CAM-350, Genesis Valor, AutoCAD, AutoVue, Acrobat etc., if necessary.
- Responded to and resolved any customer issues related to pricing, designs, panelization, etc.
- Called PCB designers/buyers to maintain strong company relationship.
- Assisted customer service representatives with any pricing issues.
- Delegated RFQs to Quote staff to meet RFQ submission deadline.
- Stayed in touch with the VP of Sales and Directors of Business Development on a regular basis for updates.
- Submitted daily booking and quotation activity reports to President, GM, and Sales Team to aid in analysis and meeting target revenue.
- Acted as Technical Support for Designers seeking cost savings in their designs.
- Drove various review processes for the group; conducted regular progress reviews of the group and/or projects.
- Prepared and presented business plans to department/group, management, and clients; negotiated and counseled in a specialist capacity with internal and external contacts.
- Exchanged appropriate information to gain cooperation, solve problems, or obtain project approval.
- Maintained and developed large accounts and conducted sales forecasting.
- Assisted in the development of the staff's proposal.
- Promoted teamwork and cooperation within the department/group, and within the organization, to achieve shared objectives.
- Encouraged and managed debate over complex and highly contentious issues to a satisfactory resolution.

Feb 2002 – Jul 2004

PreCAM Operator/Methods Engineer

TTM Technologies (formerly known as Dynamic Details Inc.)

www.ttm.com

Toronto, Ontario, Canada

- Worked as a Methods Engineer specializing in fabricating Printed Circuit Boards (PCB).
- Main recipient of the company's email communication.
- Operated as PreCAM Operator.
- Provided consultation on quotations.
- Offered expertise as a File consultant.
- Reviewed PCB files (gerbers) sent by customers using CAM-350, Genesis Valor, AutoCAD, AutoVue, Acrobat etc.
- Resolved problems encountered during the review of files from customers.
- Initiated calls to PCB designers to foster and maintain strong company-customer relationships.
- Assisted customer service representatives in the quotation process and resolution of customer issues.
- Delegated released jobs from the customer service representative to the Camming and Engineering Department.
- Tracked customers' responses to meet PCB fabrication deadline.
- Delegated reviewed files to account handlers.

EDUCATION

Apr 1993
 AMA Computer University
 Philippines-Manila-Makati

Bachelor's Degree

Bachelor of Science in Computer Engineering
 Major in Design Project

CERTIFICATIONS AND PROJECTS

- **Certifications:**
 - *The Complete 2022 Web Development Bootcamp, Udemy ([certificate](#))*
- **Portfolio Projects** (more at [My Portfolio](#)):
 - **Bubblitz – Full-Stack Reflex & Focus Game**
 - Architected and developed a full-stack browser-based reflex and cognitive focus game using React, TypeScript, Node.js, Express, Prisma, and PostgreSQL.
 - Designed scalable front-end game architecture using React Hooks, strong typing, and requestAnimationFrame for smooth high-performance rendering and animation updates.

- Implemented dynamic gameplay systems including sequential sorting mechanics (ascending/descending), progressive difficulty scaling, timed stages, score tracking, and multi-life game logic.
 - Developed RESTful APIs and back-end services to manage leaderboard functionality, score validation, and persistent game data storage.
 - Structured relational database models with Prisma ORM and PostgreSQL to support scalable score management and efficient data retrieval.
 - Built modular and reusable game systems focused on performance optimization, adaptive UI transitions, and responsive gameplay across multiple screen sizes and devices.
- **Silya – Front-End E-Commerce Platform**
 - Engineered a responsive front-end e-commerce application using React, JavaScript, HTML5, and CSS3.
 - Implemented dynamic routing, reusable components, and state management to support product galleries, filtering/search functionality, detailed product pages, and persistent shopping cart behavior.
 - Developed authentication-related UI flows including login/signup interfaces and a multi-step checkout experience with payment form validation.
 - Applied responsive design principles and optimized DOM rendering to deliver smooth user interaction across desktop and mobile devices.
 - Focused heavily on scalable component structure, maintainable code organization, and intuitive user experience design.
- **MasterMind Game**
 - Developed an interactive browser-based logic game challenging users to crack secret code sequences across multiple difficulty levels and gameplay rules.
 - Built using JavaScript, HTML, CSS, and modular game logic principles with responsive layouts supporting both portrait and landscape mobile orientations.
 - Implemented dynamic feedback systems, level progression mechanics, and adaptive UI interactions to enhance engagement and replayability.

TECHNICAL SKILLS

- **Languages and Front-End Technologies:** JavaScript, TypeScript, HTML5, CSS3, React, Responsive Web Design.
- **Back-End Technologies:** Node.js, Express.js, RESTful APIs
- **Databases & ORM:** PostgreSQL, Prisma ORM, MySQL, SQLite
- **UI Libraries & Styling:** Bootstrap, Tailwind CSS, Material UI, SASS
- **Development Tools & Workflow:** Git, GitHub, VS Code, npm
- **Design Software:** Adobe Photoshop, Canva, CorelDRAW (basic knowledge)

- **Office and Database Tools:** Microsoft Office, Microsoft Access
- **Additional Technical Proficiencies:** Software and hardware installation/configuration, LAN/WAN troubleshooting and setup
- **Foundational Knowledge:** Python, C, Pascal, Visual Basic, AutoCAD, Unity, and 3D Animation
