FULL-STACK SOFTWARE DEVELOPER

OBJECTIVE

Full-Stack Software Developer with experience designing, developing, and deploying responsive web applications using React, TypeScript, JavaScript, Node.js, Express.js, Prisma ORM, and PostgreSQL. Skilled in building modern user interfaces, RESTful APIs, relational databases, authentication and authorization systems, and cloud-hosted applications with a strong emphasis on maintainability, performance, and user experience. Seeking an opportunity to contribute to a collaborative development team while continuing to grow as a Full-Stack Software Developer.

TECHNICAL SKILLS

- **Languages and Front-End:** JavaScript, TypeScript, HTML5, CSS3, React, React Hooks, Context API, Responsive Web Design.
- **Back-End:** Node.js, Express.js, RESTful APIs, JWT, bcrypt, Authentication, Authorization, Role-Based Access Control (RBAC)
- **Databases & ORM:** PostgreSQL, Prisma ORM, MySQL, SQLite
- **UI & Styling:** Bootstrap, Tailwind CSS, Material UI, SASS
- **Development Tools:** Git, GitHub, VS Code, npm, Postman
- **Deployment & Cloud:** Vercel, Render, Neon PostgreSQL

EXPERIENCE

Full-Stack Software Developer – Independent Projects

Jan 2022 – Present | Ajax, Ontario, Canada

- Designed, developed, and deployed responsive full-stack web applications using HTML, CSS, JavaScript, TypeScript, React, Node.js, Express.js, Prisma ORM, and PostgreSQL.
- Built responsive single-page applications (SPAs) using React Hooks, Context API, reusable components, and maintainable frontend architecture.
- Designed and implemented RESTful APIs and Express.js backend services incorporating routing, middleware, validation, error handling, and CRUD operations.
- Implemented JWT-based authentication and role-based access control (RBAC), including bcrypt password hashing, protected API routes, authorization middleware, and role-based permissions.
- Designed relational PostgreSQL database schemas and managed migrations, relationships, filtering, sorting and database operations using Prisma ORM.
- Tested and validated RESTful API endpoints using Postman and performed end-to-end client-server testing during frontend integration and debugging.
- Deployed full-stack applications using Vercel, Render, and Neon PostgreSQL, including environment-variable configuration and production deployment workflows.

- Applied performance optimization, responsive design, debugging, version control, and maintainable software-development practices throughout application development.
- **SELECTED PROJECTS** (more at [My Portfolio](#)):
 - **Bubblitz Score Manager – Full-Stack Administration & Score Management Application**
 - Developed a full-stack administration application using React, TypeScript, Node.js, Express.js, Prisma ORM, and PostgreSQL for managing player and leaderboard data.
 - Implemented JWT-based authentication, bcrypt password hashing, protected API routes, RBAC, and authorization middleware for administrative functionality.
 - Built RESTful CRUD APIs and React interfaces supporting data retrieval, creation, updates, deletion, filtering, and sorting.
 - Tested backend APIs using Postman and deployed the application using Vercel, Render, and Neon PostgreSQL.
 - **Bubblitz – Full-Stack Reflex & Focus Game**
 - Architected and developed a full-stack browser game using React, TypeScript, Node.js, Express.js, Prisma ORM, and PostgreSQL.
 - Built gameplay systems incorporating progressive difficulty, timed stages, score tracking, multi-life game logic, and dynamic sorting mechanics.
 - Developed RESTful APIs, persistent leaderboard functionality, server-side score validation, ranking logic, and relational database integration.
 - Built reusable game systems using React Hooks, strong typing, responsive design, and requestAnimationFrame for smooth rendering and animation.
 - **Silya – Front-End E-Commerce Platform**
 - Developed a responsive e-commerce application using React, JavaScript, HTML5, and CSS3.
 - Implemented routing, reusable components, product filtering/search, detailed product pages, state management, and persistent shopping-cart functionality.
 - Built responsive interfaces and multi-step shopping and checkout experiences across desktop and mobile devices.
 - **MasterMind Game**
 - Developed an interactive browser-based logic game using JavaScript, HTML, and CSS with multiple difficulty levels and responsive layouts.
 - Implemented dynamic feedback, level progression, gameplay logic, and adaptive interfaces for desktop and mobile devices.

PROFESSIONAL EXPERIENCE

Sr. Quotation Specialist - Lazer-Tech Limited
 May 2012 – Jan 2022 | Toronto, Ontario, Canada

- Led quotation operations, cost estimation, pricing-matrix development, and bid-proposal preparation for PCB manufacturing projects.
- Managed quotation processes and supported the Sales Team in achieving revenue objectives while reporting directly to the company President.
- Analyzed customer PCB designs using CAM-350, Genesis Valor, AutoCAD, AutoVue, and related engineering tools.
- Provided technical consultation to customers and PCB designers to identify design and manufacturing cost-saving opportunities
- Resolved complex pricing, design, and customer issues while collaborating across sales, customer service, engineering, and management teams.

Sr. Quotation Analyst - Firan Technology Group (FTG)

Jul 2004 – May 2012 | Toronto, Ontario, Canada

- Led quotation operations, pricing-matrix development, cost estimation, bid proposals, and long-term pricing activities.
- Managed quotation workflows and delegated RFQs while coordinating with executive management, sales leadership, customer service, and engineering teams.
- Analyzed PCB designs and manufacturing requirements using CAM-350, Genesis Valor, AutoCAD, AutoVue, and related engineering tools.
- Prepared business, quotation, booking, and forecasting information to support management and sales decision-making.
- Provided technical support to customers and designers while resolving complex pricing, design, manufacturing, and project issues.

Methods Engineer - TTM Technologies (formerly known as Dynamic Details Inc.)

Feb 2002 – Jul 2004 | Toronto, Ontario, Canada

- Supported PCB manufacturing as a Methods Engineer and PreCAM Operator, reviewing customer Gerber files and manufacturing requirements.
- Analyzed PCB designs using CAM-350, Genesis Valor, AutoCAD, AutoVue, and related engineering tools.
- Resolved technical file and manufacturing issues and communicated directly with PCB designers and customers.
- Coordinated released projects between customer service, CAM, and engineering teams to support production deadlines.

EDUCATION

Bachelor of Science in Computer Engineering - Major in Design Project

AMA Computer University | Makati, Philippines | 1993

CERTIFICATIONS

The Complete 2022 Web Development Bootcamp - Udemy

Certificate available through portfolio/GitHub - ([certificate](#))
